Environmental Sciences

# Add Title of Presentation

Add Subtitle of  
Presentation

Author on Title Page

Occation of Presentation, 28.06.2024

# Example slide title

Formula in serif-font as in papers (can be changed in LaTeX preamble):

$$a + b = c \int f(x) dx \quad (1)$$

## Remember this!

The block appearance can be easily changed in the LaTeX preamble

## Very Important

Sample text in red box

## Top aligned

In the LaTeX preamble, we set [t] for top aligned content as in Powerpoint

Bullets are smaller than in LaTeX, and begin aligned with text:

- Level 1
  - Level 2
    - Level 3

# A list that is revealed

- PSI-style
- With dash instead of bullet if you like
  - 1. Enumerated 1a
  - 2. Enumerated 1b

# A list that is revealed

- PSI-style
  - With dash instead of bullet if you like
    1. Enumerated 1a
    2. Enumerated 1b
- Item 2 (revealed on next slide)

# A list that is revealed

- PSI-style
  - With dash instead of bullet if you like
    1. Enumerated 1a
    2. Enumerated 1b
- Item 2 (revealed on next slide)
- Item 3
  - Item 4
    - Item 5

# The PSI colors

This is a color predefined in beamer called `structure`

# Titles over two lines are possible

Some formulas, which can be tagged, e.g. (\*):

$$\Gamma = \int_a^b f(x) dx \quad (*)$$

$$\sum_{n=1}^N x_{i_n} = \left( \frac{a+b}{c+d} \right) \cdot \sin(x)$$

- $\alpha = \zeta$ ; `\boldsymbol{\alpha} = \zeta`
- $\mathcal{F}_t, \mathbb{R}^n$
- $\{t \mid t = 1, \dots, T\}$
- $f: X \rightarrow Y$ ;  $f: x \mapsto y$ ; use `\colon`
- $y_n x_n^m$  versus  $y_n x_n^m$

The color of this text is called `alert` in beamer. We use ‘Squeeze’ on this dense slide

You can start text high with a top-aligned frame in beamer

Columns:

**Title of block**

Top-aligned block in first column

**Title in block**

Block in second column

**Example**

Title of example block Block in first column

Text outside of block in first column

This is a box (without title)

**Title of alert block**

Block in second column

Block with empty title

This is a box (without title)

A slide with vertical centering.

Figures are automatically horiz. centered in beamer

# Overwrite the margins

You can overwrite the margins with a wide column:

We need more space:

This is a very long text that needs a lot of space this is a very long text that needs a lot of space  
this is a very long text that needs a lot of space
