Ludwig Wittgenstein :: Laboratory of Energy Systems Analysis, Paul Scherrer Institute

A novel approach to energy system analysis and technology assessment

1st Line
2nd Line (a 3rd line may be required for single-line titles to move gray box down)

LEA Seminar, 1.1.2021

A list that is reveiled

- Item 1
- Item 1 (with dash instead of bullet)
  - Item 1b

- Item 1
- Item 1 (with dash instead of bullet)
  - Item 1b
- Item 2 (revealed on next slide)

- Item 1
 - Item 1 (with dash instead of bullet)
   - Item 1b
- Item 2 (revealed on next slide)
- Item 3
  - Item 4
    - Item 5

Titles over two lines are possible (just the PSI logo is a little bit down)

This is a frame with the usual 'squeeze' option of beamer to narrow linespacing a little bit, The color of this text is called "alert" in beamer

This is a color predefined in beamer called "structure"

$$a + b = \int_a^b f(x)\, dx$$

$$\sum_{n=1}^{N} x_{i_n} = \frac{a+b}{c+d}$$

- $\alpha = \zeta$
- $\mathcal{F}_t, \mathbb{R}^n$
- $\{t \mid t = 1, \ldots, T\}$
- $f \colon x \to y$

Columns and Blocks

You can start text very high with the space command with the code in the .tex file of this slide
The color of the blocks are defined in the preamble of the .tex file:

Text in a block
This is a block of text in the first column

Text in an example block
This is a block of text in the first column

Text outside of block in first column

Text in a block
This is a block

Text in an alert block
This is a block

This is a block without title (not nice...)

You can start text a little bit lower with the command in this slide

Figure: Figures are automatically centered

My thanks go to

- Co-author 1
- Co-author 2 who has a very long name
- Supervisor 1
- Supervisor 2
